Subject: North Eastern California BLM water quality data

Dear Gene and Joe: Here is BLM's water quality data for north eastern CA. It includes Alturas, Eagle Lake and Surprise Valley Resource Areas. When you open the workbooks there are 3 separate databases. "320" is the Alturas Field Office area, 350 is Eagle lake, and 370 is Surprise Valley. The "310_stations" file shows locations for all three areas. The WQ-2000 file shows water quality and flow data for all 3 areas. I also have continuous temperature monitoring on a few creeks if you are interested in that.

Jami Ludwig
Hydrologist
BLM Alturas Field Office
